SITI TIARA NUR AZIZA

Information Systems Graduate| Garut, Jawa Barat (Ready to Relocate)| Email : tiaranuraziza517@gmail.com | No.HP :081910069108 | Linkedln : https://www.linkedin.com/in/siti-tiara-nur-aziza-901294229/

SUMMARY

Information Systems graduate with an interest in Software Quality Assurance (QA) and Software Testing. Experienced in manual and automation testing through academic projects and software development internship. Skilled in Black Box Testing, test case and test scenario creation, bug reporting, SQL/MySQL, and web technologies. Detail-oriented, communicative, and able to work collaboratively in a team.

EDUCATION

Institut Pendidikan Indonesia Garut (2022 – 2026)

Bachelor of Science in Information Systems

TECHNICAL SKILLS

- **Testing & QA Tools:** Katalon Studio, Automated UI Testing, Manual Testing, Black-Box Testing, Postman (Basic API Testing), Test Case & Scenario Design, Bug Tracking & Reporting.
- **Programming & Web Development:** PHP, Laravel Framework, JavaScript, React (Basic), HTML5, CSS3, REST API.
- **Database Management:** MySQL (Relational Database Design, CRUD Operations, Query Optimization, Multi-Tenant Database).
- **Developer Tools:** Visual Studio Code, XAMPP, Laragon, Git & GitHub.
- **SDLC & Testing:** System Requirement Analysis, Technical Documentation, Functional & UAT Testing, System Troubleshooting.
- **Languages:** Indonesia (Native), English (Technical Working Proficiency).

QUALITY ASSURANCE & TESTING PROJECTS

Automated Testing – Library Information System (Academic Project) | June 2025

- Designed a structured Test Plan and Work Breakdown Structure (WBS) covering end-to-end QA execution phases.
- Automated 13 regression test suites across Chrome environments using Katalon Studio, validating authentication, CRUD data management, search filters, and transaction features with a 100% pass rate.
- Generated automated execution logs and evaluated system reliability against user specifications.

Functional & Black-Box Testing – Shoe Inventory Management System (Academic Project)

- Formulated test scenarios and structured 20+ manual test cases detailing Preconditions, Test Steps, Test Data, and Expected vs. Actual Results.
- Executed manual black-box functional testing, identifying defects (Fail and Blocked statuses) and documenting reproduction steps for developer remediation.
- Compiled test summary reports to evaluate defect density and ensure requirement traceability.

SOFTWARE DEVELOPMENT & WORK EXPERIENCE

Government Institution – Information System Developer (Undergraduate Thesis / Final Project) (2026)

- **System Requirement Analysis:** Identified operational needs in government personnel administration, analyzed user requirements, and mapped administrative workflows into technical system

specifications.

- **Application Design & Development:** Designed relational database architectures and built core features for a web-based management system using Laravel**.**
- **Documentation & Testing:** Authored technical system documentation, created user manuals, and conducted functional testing prior to implementation.

WIT ID — Web Developer Intern (July 2025 – October 2025)

- **Backend & API Development:** Implemented core business logic and built RESTful APIs using the **Laravel (PHP)** framework within a Multi-Tenant architecture.
- **Database Design & Management:** Designed and maintained **MySQL** database schemas for multi-tenant environments, ensuring data isolation, consistency, and optimized queries.
- **Troubleshooting & Testing:** Performed code debugging, resolved application errors, and ensured smooth integration across features.

Kecamatan Karangpawitan — Public Service Administrative Intern (December 2020 – January 2021)

- Managed civil registration and population administration records accurately and systematically.

CERTIFICATIONS

Vocational Competency Certification in Computer and Network Engineering (TKJ) (March 2021)

- Designed network IP addressing schemes and configured routing across network devices
- Configured network switches, structured cabling, and set up wireless networking infrastructure.

ORGANIZATIONAL EXPERIENCE

Student Executive Board (BEM), Faculty of Applied & Natural Sciences (FITS) — *Public Relations Division Member (2024 – 2025*)

- Managed the *Synergy Network* program, drafted project timelines and budgets, and coordinated inter-institutional communication and events.

Information Systems Student Association (HIMASIFOR) (2023 – 2024)

- Collaborated in organizing the ISCAMENT Workshop and supported organizational resource management.
